MIND THE GAP

STS & BUNKERING

PRODUCT RANGE | STS & BUNKERING

PNEUMATIC FENDERS

Our Pneumatic Fenders are first class fenders manufactured in full compliance with ISO 17357-1:2014. We promise outstanding performance and durability, supporting you in running a safe operation – on time!

RANGE:

Chain & tire net fenders (Sizes from 1,0 m x 1,5 m to 4,5 m x 9,0 m)

Sling fenders (Sizes from 0,5 m x 1,0 m to 4,5 m x 9,0 m)

OPTIONAL FEATURES:

- Heavy duty aircraft tyre net
- Special colors, both fender body and tyre net
- GPS and internal pressure sensor - monitoring device
- Other special sizes on request

DAVITS

Fender davits is the most efficient and safe way of handling your fenders. A davit, with inbuilt cradle, will store your fenders on deck, ready for deployment and operations. Handling is done from a control panel, or remote control.

RANGE:

2.0 x 3.5 m fender - Davit SWL 2 tons

2.5 x 4.0 m fender - Davit SWL 3 tons

2.5 x 5.5 m fender - Davit SWL 4 tons

3.3 x 6.5 m fender - Davit SWL 7 tons

4.5 x 9.0 m fender - Davit SWL 15 tons

HOSES

Nordic Fender supplies all types of hoses for marine and offshore use, and for our clients within the Ship-to-Ship (STS) and bunkering market.

RANGE:

Composite cargo, vapor & metal hoses

Rubber bunker & marine offshore hoses

Manifold reducers, expansion joints & valves

Dry disconnect & marine break away couplings

(Mass) flow meters

Insulation and blind flanges, gaskets, bolts and nuts

STS operations requires careful planning, coordination, and compliance with international safety and environmental standards. Nordic Fender supplies quality equipment for your operation - on time!

HOSE BUNS & HOSE SLINGS

A hose bun is a lifting device employed to gently elevate hoses, safeguarding them from excessive external forces, and preventing kinking.

Hose handling slings are employed to safeguard hoses from being crushed, bent, or severed. They evenly distribute the weight of discharge hoses across their width, preventing damage.

RANGE:

Hose handling buns for lifting and support

Hose handling slings for support

Hose trolleys for easy maneuvering on deck

RIGGING GEAR

STS and bunkering require more than just the fenders and hoses itself. All operations require a detailed plan, and how the equipment is handled and secured play a key role. Nordic Fender will provide you with:

RANGE:

Guy ropes for fenders & mooring lines (PP rope, HMPE, wire, chain)

Hardware: chain, swivels, masterlinks

Lifting slings

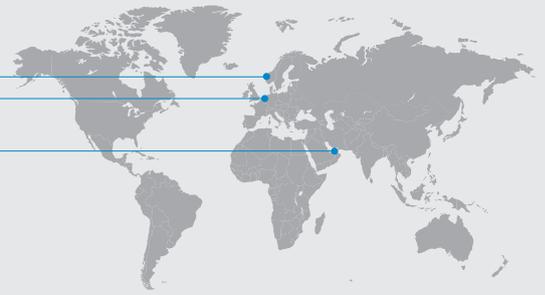

TRANSFER BASKETS

A personnel transfer basket is a preferred mode of transferring personnel as it is safe, fast, and economical.

Typically used in offshore operations and marine environments for the safe transfer of personnel between vessels or rigs/platforms. The use of transfer baskets is common in the oil and gas industry, especially during offshore activities such as crew changes, emergency evacuations.

SERVICE & RENTAL

Our service team and partners are mobile and can assist worldwide.

WE OFFER:

Fender inspections

Safety valve testing and re-certification

Simple repairs

Complete re-netting

Training

Maintenance and service program is highly recommended – we have a dedicated service team available.

Nordic Fender offers rental services of pneumatic fenders and STS equipment from all bases. We can mobilize our fenders on short notice, and offer mob/demob, transportation arrangements and STS services such as mooring masters, hoses and pertaining equipment
